

KAVINKUMAR B

 Kavinkumar B |  +91 8072677947 |  kavin.apm2003@gmail.com |  Theternos

Skills

- Python | Power Bi | SQL | MySQL | NoSQL | RDBMS | Data Structure | JavaScript | PHP | React.js | Node.js | Express | Git | Agile | Testing
- Azure | Cloud Computing | Linux
- Coding | Frontend | Backend | English – [R, W, S], Tamil – [R, W, S]

Projects

Task Management System (TaskFlow)

01/2025 – 04/2025

- Developed a full-featured web application using the MERN stack, enabling task creation, assignment, real-time progress tracking, and role-based access control to enhance workflow efficiency.
- Designed the system architecture utilising high availability models and implemented a seamless user interface with real-time notifications, enhancing productivity, collaboration, and user experience while maintaining low latency.

Appointment Booking and Managing in Hospitals

06/2023 - 09/2023

- Streamlined patient services by integrating data from hospital consultation and medical booking systems, using Python, JavaScript, MySQL, and PHP to automate and manage appointment processes.
- Designed multilingual systems to optimise communication, improving user experience and increasing operational efficiency through data-driven decision-making

Document Management Portal

02/2023 - 04/2023

- Developed an online portal for secure document management, implementing access control and audit trails to ensure data integrity, with a focus on enhancing data security using PHP, Python, MySQL, and HTML/CSS.
- Used data-driven methods to ensure accurate permissions and data tracking, aligning with real-time business needs and regulatory compliance.

Invigilator and CoE Portal

12/2022 - 02/2023

- Initiated software development to streamline invigilation duties using data analysis to optimise staff assignments and improve operational efficiency.
- Implemented a data-driven system for real-time updates and adjustments to invigilation and exam management processes, enhancing overall efficiency while adhering to digital frameworks.

Event Registration Portal

11/2022 - 12/2022

- Developed an event registration portal with data analytics to track participant engagement and streamline registrations. Automated data processing and reduced inefficiencies, enabling real-time updates and analysis for decision-making.
- Used SQL and backend data processing to create a reliable system for managing and analysing event data.

Experience

Data Analyst

07/2024 - Present

- Collaborated with business stakeholders on Gemini's multimodality project to transform scattered data into meaningful insights, enhancing product usability and uncovering new growth opportunities through problem-solving initiatives.
- Pod lead for 7 team members, guiding them through task assignments and ensuring successful project completion, fostering collaboration, and mentoring junior data scientists.

Education

Bachelor of Engineering

Bannari Amman Institute of Technology

Erode, Tamil Nadu

2025th Batch

- Major in Computer Science and Engineering | CGPA - 8.11 (Till 7th Sem)

Consultancy Works

- **Document Vault:** Developed Internal Document Management Software with High Security | Valued at Rs. 92,000 (02/2023 - 04/2023)
- **User Management Portal:** Achieved Rs. 45,000 budget for seamless user info, salary, and attendance management (06/2023)

Achievements

- **Runner of WorldSkills:** BRICS-FS-48 | Digital Application of Highway Construction and Maintenance (11/2024)
- **Runner of Hackathon:** Appointment Booking and Managing in Hospitals | Rs. 10,000 Cash Prize (09/2023)
- **Winner of Hackathon:** Automated Invigilation & CoE Software | Rs. 10,000 Prize | Upcoming Implementation at my College (02/2023)
- **Runner-Up in Robotic Contest:** Maze Solver Competition | Achieved 95% Faster | Rs. 5000 Cash Prize (03/2023)

Others

- **Patent:** Ambient Air Quality Analysis using Quality Index [Filed]
- **Paper Presentation:** Based Automation of Home Appliances | Improving the Mobility Performance of UGV Vehicles
- **Online Course:** Introduction to IoT – NPTEL | Fundamentals of Deep Learning – NVIDIA DLI
